Safe-to-Save emergency savings for people whose income moves week to week.

By Zwe Htet Kyaw

ASEAN FINANCIAL HEALTH CHALLENGE 2026 · PROBLEM STATEMENT 2: EMERGENCY SAVINGS · SOLO SUBMISSION

WHO IT'S FOR

BUILT BY SOMEONE LIVING THE PROBLEM

"I'm an international student in Singapore. I budget week to week and take odd jobs to make ends meet."

When pay moves and rent doesn't, "just save 10%" isn't advice. It's a risk. I built the tool I needed.

Students who work

Part-time shifts, odd jobs, tutoring.

Gig and shift workers

Riders, retail, F&B, factory overtime.

Cash earners

Cash wages and mobile wallets, no bank login needed.

IN THEIR OWN LANGUAGE

Singapore English · 中文 · Melayu · தமிழ் **Philippines** English · Filipino **Myanmar** English ·

THE PROBLEM

ONE BAD WEEK CAN UNDO MONTHS OF SAVING

Income moves

Gig payouts, shift work and daily sales change week to week.

Bills don't

Rent, school fees and loan payments land on fixed dates.

One shock forces a choice

Cut essentials or borrow at high interest. Savings that were never safe to set aside make it worse.

To help people build and keep an emergency buffer, even when income is irregular.

**** People might be put off from seeing numbers, but they are the ones keeping us in line.*

GFTN

Many people ask:

"HOW CAN WE BUILD AN EMERGENCY SAVINGS BUFFER THAT WORKS WELL WITH OUR DYNAMIC INCOME? WHICH TOOL DO WE USE? HOW CAN WE BUDGET BETTER?"

SavvyMoni answers this one question, every day.

HOW IT WORKS

THREE STEPS, NO BANK LOGIN

1 · Bring your records

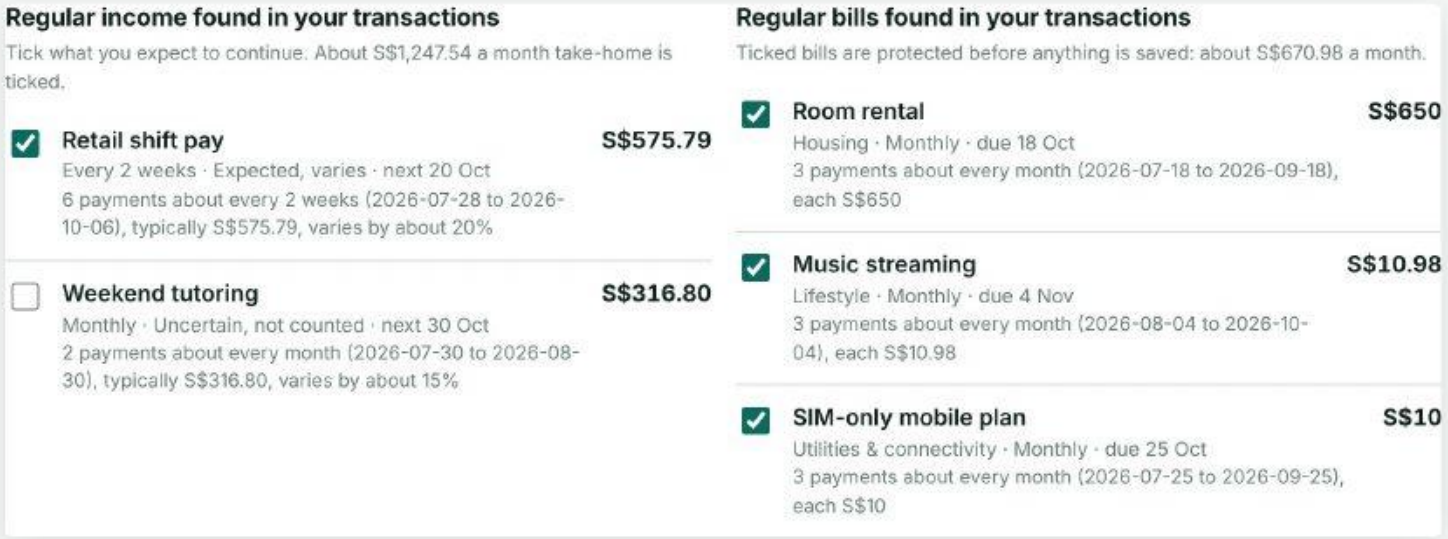

Bank or e-wallet export, our template fill-in, or a cash book.

2 · Budget every expense

35 days ahead. Every necessary bills and daily essentials are protected; uncertain income counted cautiously.

3 · One clear answer

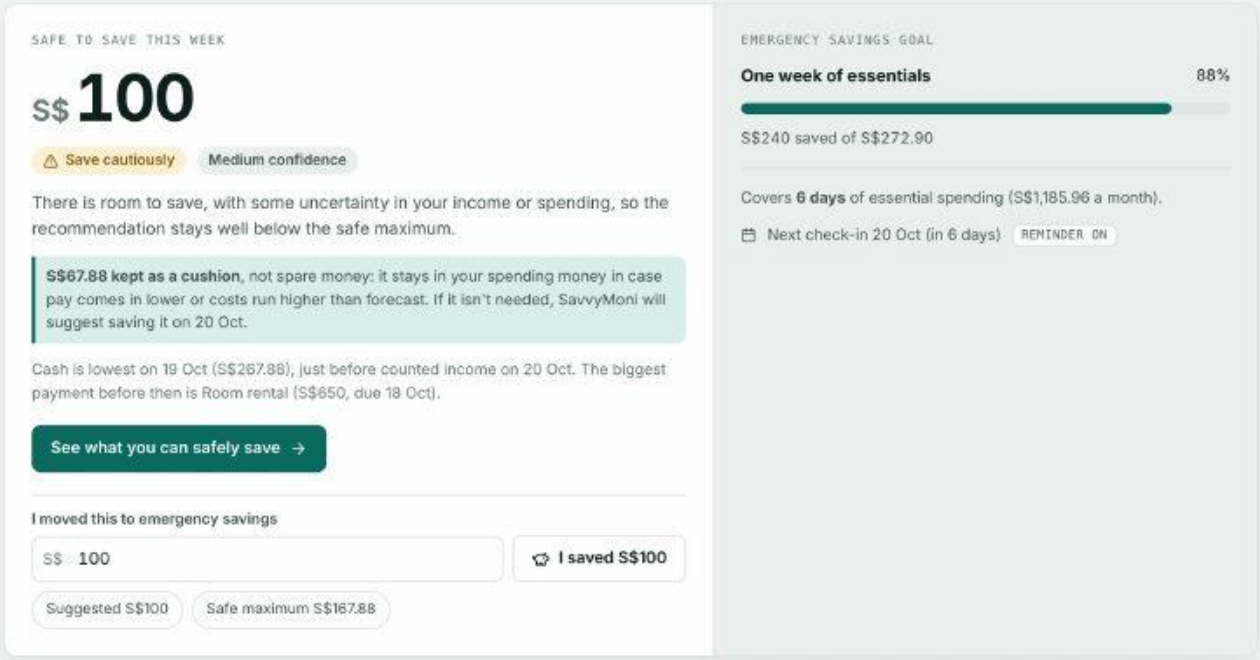

Save, widen a cushion, or pause, always with the reason.

THE ANSWER, EVERY DAY

A NUMBER YOU CAN TRUST, AND WHY

Safe max S$167.88 = lowest cash before rent, minus a S$100 reserve.

Suggests S$100 because pay varies ~20%. The rest stays as a cushion.

Unused cushion? Offered for saving at the next payday.

Ask SavvyMoni: an AI assistant that answers and supports your budget decision, so you will always have a good safety net.

WHEN THE SHOCK COMES

TRY THE SHOCK BEFORE IT HAPPENS

Emergency cost	Covered by savings	From everyday cash	Lowest cash buffer
S$400	**S$240**	**S$160**	**S$107.88**
No pay lost	S$0 left of S$240	Already protected in the plan	Reserve S$100

(The next income in, building back the buffer)

Before and after

Projected spendable cash. Emergency savings that cover the cost are moved into cash, so nothing is counted twice.

Your position

	BEFORE	AFTER
Emergency savings	S$240	S$0
Essentials covered	6 days	No cover yet
Protected obligations	S$1,265.15	S$1,665.15
Safe to save	S$100	S$0

Pause savings

A S$400 dental bill: S$240 from savings, S$160 from the next pay, not pushing for saving for the time being to recover. Mandatory bills still covered; saving pauses.

Prepare → Save → Shoc → Recover → Rebuild

WHY IT'S DIFFERENT

BUILT FOR INCOME THAT MOVES

	Fixed savings rules	Budgeting apps	SavvyMoni
Decides the safe amount, by date	×	×	✓
Protects bills before saving	×	Partly	✓
Handles irregular income cautiously	×	×	✓
Explains every number; AI grounded in the engine	×	Partly	✓
Works from a spreadsheet or cash book, offline, no bank API	✓	Rarely	✓

The spreadsheets of the scenarios with varying pays across countries:

Singapore Student Worker

Philippines-delivery-rider

Myanmar-garment-worker

EXPECTED IMPACT

SAVINGS THAT SURVIVE THE NEXT SHOCK

Fewer missed essentials

No rent or fee shortfall caused by saving too much.

A first real buffer

The S$100 or custom amount (or local equivalent) kept out of calculation to fall back on

Less high-interest debt

Shocks absorbed by savings, not payday loans.

How we'll prove it: a 10-week randomised pilot

80–120 irregular earners. Adaptive amounts vs a fixed savings rule. Measure buffer size, missed ess
borrowing.

No user results yet. These are hypotheses the pilot is designed to test.

SCALING ACROSS ASEAN

ONE ENGINE, ACROSS THE DEVELOPMENT RANGE

SINGAPORE · SGD

Aisyah — Your records

312 transactions, 1 income sources and 3 bills from your own records.

Country-specific shock

Unexpected dental bill

Unexpected dental bill: S$400, on 16 Oct.

Safe to save	S$100 → **S$0**
Status	Save cautiously → **Pause savings**
Emergency savings	S$240 → S$0
Paid from savings / cash	S$240 / S$160
Income lost	S$0
Essentials short	**S$0**
Essentials covered by savings	6 days → No cover yet
Rebuild savings to S$240	not reachable yet

Use S$240 of emergency savings. This is exactly what the buffer is for.

Open Singapore →

PHILIPPINES · PHP

Sample workbook — Synthetic

Sample: delivery rider with weekly e-wallet cash-outs, cash spending and a motorcycle loan.

Country-specific shock

Motorcycle repair

Motorcycle repair: ₱8,000, 4 days without income, on 16 Oct.

Safe to save	₱300 → **₱0**
Status	Save cautiously → **Pause savings**
Emergency savings	₱1,200 → ₱0
Paid from savings / cash	₱1,200 / ₱6,800
Income lost	₱6,971.09
Essentials short	₱10,862.65
Essentials covered by savings	2 days → No cover yet
Rebuild savings to ₱1,200	₱1,050/wk, ~3 wks

Use ₱1,200 of emergency savings. This is exactly what the buffer is for.

Set up Philippines →

MYANMAR · MMK

Sample workbook — Synthetic

Sample: garment worker with wages twice a month, overtime that comes and goes, cash and a mobile wallet.

Country-specific shock

Clinic visit and medicine

Clinic visit and medicine: K80,000, 2 days without income, on 15 Oct.

Safe to save	K6,000 → **K0**
Status	Save cautiously → **Pause savings**
Emergency savings	K40,000 → K0
Paid from savings / cash	K40,000 / K40,000
Income lost	K0
Essentials short	K9,050
Essentials covered by savings	5 days → No cover yet
Rebuild savings to K40,000	not reachable yet

Use K40,000 of emergency savings. This is exactly what the buffer is for.

Set up Myanmar →

Singapore · high income

Student worker or working professional with uncertain gigs. Bank exports, fortnightly shift pay.

Philippines · upper-middle

Delivery rider. E-wallet cash-outs, motorcycle loan.

Myanmar · least developed

Garment worker. Cash, overtime that comes and goes, offline.

Each country in its own languages: Melayu, தமிழ், Filipino, မြန်မာ.

BUSINESS MODEL

FREE FOR PEOPLE, PAID BY PARTNERS

Banks & e-wallets

License it as an embedded savings module.

Employers

A financial wellbeing benefit for shift staff.

Gig platforms

A worker benefit that improves retention.

National orgs

Grant-funded deployments for the unbanked.

Never: *selling data, lending, or credit commissions. Our only incentive is a safer buffer.*

WHAT'S NEXT

Currently working

Import, safe-to-save engine, shock simulator, recovery planner, AI assistant.

102 automated tests and 17 end-to-end flows, offline included.

3 countries and 6 languages on 1 engine.

Asking for

A pilot partner: an e-wallet, bank or gig platform.

Mentorship on regulation and data protection.

A sandbox route to test with real users.
