LANGUAGES

- English (Fluent)
- Chinese (Advanced)
- Italian (Basic)

HOBBIES & INTERESTS

- Building personal coding projects
- Exploring AI and machine learning tools
- Working out
- Badminton
- Reading novels

CCA

- NYP Technopreneur Club - Subcommittee member
- NYP SIT Club - member and regular participant
- NYP Voice Ensemble Club - member and regular participant
- NYP Sketch Art Club - member and regular participant

PROFILE

3rd-year Information Technology diploma student with hands-on experience in full-stack development, software testing, and web application security.

Built projects using React, TypeScript, Node.js, .NET, PostgreSQL and AI APIs, with industry experience supporting enterprise application testing and security remediation.

Seeking an entry-level Software Engineer or Full-Stack Developer role, planning to graduate in March 2027

EDUCATION

Nanyang Polytechnic 2024 - present

Diploma in Information Technology

University of the People 2023 - present

Bachelor of Science in Health Science

University of Medicine 1, Yangon 2018 - 2022

Medical Studies - MBBS Programme (discontinued)

PROFESSIONAL EXPERIENCE

Toppan Ecquaria Pte. Ltd. — Software Engineering Intern

Singapore | Mar 2026 - Aug 2026

- Performed UAT and manual functional testing across eLitigation-related systems, executing test cases, documenting defects and validating fixes across application workflows.
- Supported web application security remediation, investigating and resolving findings involving issues such as XSS, CSRF, path traversal, insecure configuration and security headers.
- Contributed to web accessibility remediation, identifying and correcting accessibility issues to improve compliance and usability.
- Used Selenium for browser-based testing and supported regression/verification activities following application changes.
- Compared existing InfoPath forms with replacement web forms, validating functionality, field mappings and behavioural differences to support system modernisation.
- Collaborated with developers and project team members during testing, defect resolution and deployment-readiness activities.

TECH SKILLS AND KNOWLEDGE

- Languages** : Python, JavaScript, TypeScript, C#, Kotlin, Java, SQL
- Frontend** : React, HTML, CSS, Tailwind CSS, Jetpack Compose
- Backend** : Node.js, Express.js, ASP.NET Core/.NET Web API, REST APIs
- Databases & ORM** : PostgreSQL, MySQL, SQLite, MongoDB, Prisma, Sequelize, Room, Entity Framework Core
- AI & Cloud** : OpenAI API, Claude API, AWS Rekognition, TensorFlow (basic)
- Tools** : Git, GitHub, Docker, Postman, Visual Studio, VS Code, Android Studio, VMware Workstation
- Practices** : Agile/Scrum, Azure DevOps, unit testing, Web App Security, API testing/debugging

PROJECTS / ASSIGNMENTS

Portfolio: lucian-portfolio.vercel.app/ | **GitHub:** github.com/lucwu00

TaskFlow — Office Task & Workforce Scheduling Platform

React · TypeScript · Express · PostgreSQL · Prisma

- Designed a hierarchical permission model based on organisational reporting relationships, restricting task assignment and visibility according to role.
- Built role-gated task workflows with an append-only audit trail, notifications and threaded task discussions.

SGHawkers — Real-Time Hawker Ordering Platform

React · Express · PostgreSQL · WebSocket

- Developed customer and hawker applications sharing a real-time backend, with live order updates delivered through WebSockets.
- Built hawker-side functionality including inventory management, waste logging, order management and operational dashboards.

FinSightAI — AI-Assisted Insurance Management Platform

React · Node.js · SQLite · OpenAI

- Developed Policy and Import modules with bulk Excel ingestion, validation, AI-assisted data cleaning and client-ID generation.
- Designed a preview-and-rollback workflow to validate imported records before database commitment.

SingInk — Printer & Ink Compatibility Platform

React · .NET Core · MySQL · AWS Rekognition

- Implemented an AWS Rekognition-powered printer identification feature that analyses uploaded printer images and maps recognition results to compatible printer and cartridge data.
- Developed CRUD-based troubleshooting categories/subcategories and purchase-based access control, restricting specific support guides to customers who purchased the corresponding product.

FlixVault — Android Movie Discovery Application

Kotlin · Jetpack Compose · Room · TMDB API

- Built a layered UI → ViewModel → Repository → Room architecture integrating live TMDB movie data.
- Implemented favourites, search, local caching, offline support and error handling.

CERTIFICATES

AI Fundamentals with IBM SkillsBuild

AI For Everyone - Coursera

Node.js & Express - Udemy

Docker Essentials - Udemy

AWS Cloud Practitioner - Udemy
